

PELLETIZED GYPSUM

(Calcium Sulphate)

CHEMICAL ANALYSIS

Calcium (Ca)	20.0% - 23.0%
Sulphur (S)	6.0%
Binder (Lignosulfonates)(Approx.).....	2.0%
Moisture (Max)	1.0%

Bulk Density – 63 lbs/cu ft

PRODUCT FEATURES

Pelletized Calcium Sulphate is an effective source of both Calcium and Sulphur. It is produced from high quality mined Calcium Sulphate, finely ground for maximum utility, blended with a special water-soluble organic binder and manufactured into mini pellets. It is then dried to less than 1% moisture and screened to size. Calcium Sulphate is screened to 95% between 20 and 50 mesh screens.

PACKAGING

Pelletized Gypsum is available in bulk.
