

F 425 G

(GRANULAR 25% ZINC OXY-SULPHATE)

SPECIFICATIONS

Guaranteed Analysis:	Zinc, weight %	25.00%
Typical Analysis:	Sulphur, weight %	8.00%
	Bulk Density, lbs. per cubic foot	80
	Particle Size	90% -6 + 16 Mesh
	Physical Appearance	Greyish Brown Granule

SHIPPING CONTAINERS Bulk, 25 Kg Bags, or
1,000 Kg bags

PLANT LOCATIONS Walnut Ridge, AR

AGRONOMIC CONSIDERATION

Low analysis zinc for excellent field distribution which enhances nutrient uptake at low application rates. Partly acidulated for ready availability with the remaining zinc in finely divided oxide form for building soil zinc reserves.

GENERAL RECOMMENDATIONS

Use soil tests as a guide for zinc application rates. Typical used rates would be 10 to 25 pounds per acre in a bulk blend for broadcasting or 5-15 pounds per acre in a prepared blend for side-banding at planting..

MANUFACTURING CONSIDERATIONS

Normal bulk blending procedures.
