## PELLETIZED GYPSUM (Calcium Sulfate)

### CHEMICAL ANALYSIS

Calcium (Ca) .....	21.0%
Sulfur (S).....	16.0%
Calcium Sulfate (CaSO <sub>4</sub> ).....	70.0%
Calcium Sulfate Dihydrate (CaSO <sub>4</sub> - 2H <sub>2</sub> O)*.....	88.0%
Binder (Lignosulfonates)(Approx.).....	2.0%
Moisture (Max) .....	1.0%

\*California

### PRODUCT FEATURES

Pelletized Gypsum is a fast-acting, effective, efficient product designed specifically to supply available Calcium and Sulfur to plants and soil as well as to counteract certain problem soil conditions.

Pelletized Gypsum is produced from high quality mined Calcium Sulfate, finely ground to ensure optimum availability, and blended with a special water-soluble organic binder. It is then manufactured into a convenient pelletized formulation. Pelletized Gypsum is then dried to less than 1% moisture and screened into uniform sizing to allow for specific applications. Pelletized Gypsum is non-corrosive and safe for use around humans, animals and for the environment.

### PACKAGING

Pelletized Gypsum is packaged in 50 lb professional heat-sealed poly bags, 1,000 lb and 2,000 lb bulk bags and is also available in bulk
